

# CARITAS MOROCCO

## VISION

Caritas Maroc, inspired by God's love and the spirit of Christian fraternity, envisions a more just, free and sustainable world. It strives to be a key actor in promoting integral human development, inclusive societies, solidarity with the most vulnerable, care for our common home and a socially equitable economy.

PREFECTURE,  
23 PARISH  
CARITAS**

## PROGRAMS

### EMERGENCY RESPONSE

Following the devastating 2023 earthquake in Morocco, Caritas Morocco has provided comprehensive support to affected communities. The humanitarian response spans multiple sectors, including emergency shelter, water and sanitation services (WASH), and livelihood restoration programs. Through these initiatives, they are helping victims meet their immediate needs while also focusing on sustainable recovery.

### HUMANITARIAN

The support program focuses on family wellbeing through multiple initiatives. For children, it provides educational and recreational activities while supporting their mothers with essential needs and school necessities. Also the program empowers women by promoting their independence, defending their rights, and facilitating access to basic services, with an emphasis on their social and economic engagement. Additionally, it offers vital assistance with administrative and legal matters, including help with identity documentation, civil registration and consular paperwork.

### HEALTH

By facilitating access to medical services and providing financial assistance, the program accompanies individuals to medical centers, helps with medication purchases, and covers medical expenses for those facing financial hardship. For people with mobility needs, it offers specialized services encompassing medical care, psychological support, and educational workshops.

### LIVELIHOOD

The economic independence is fostered by providing vocational training and employment support. The initiatives focus on entrepreneurship development and creating pathways for socioeconomic inclusion, particularly targeting marginalized communities.
